

Amendments

Amendments to the Specification

Please amend the specification as set forth below.

[0030] Please replace paragraph 30 on page 8 of the specification as follows:

“As can be seen from Figures 7a and 7b, an optical element 34 which is designed as a lens and arranged at a distance from the luminous plate 30 is provided. A lower region L_1 of the luminous panel which runs along the preferred edge wall 32' corresponds to an intensity range I_1 of light distribution, at the edge of which runs the light/dark boundary LDB (“HDG” in the drawings). An upper region L_2 of the luminous panel is projected in a lower intensity range I_2 of light distribution projected on a measuring screen arranged at a standardised distance. The luminous plate 30 is preferably arranged in a focal plane 36 of the lens 34.”
